

# OHIO DEPT OF MENTAL HEALTH

## Same Day Service Reporting: Roll-up Categories for Duplicate Checking

Providers will need to summarize based on the procedure code, modifiers 1 & 2, and place of service for the combinations shown below. If the place of service is not used in the definition (that is, the client is not in the penal system or in an inpatient psychiatric facility), all services regardless of service location must be rolled up. For multiple places of service in the same day, the recommendation is to use Place of Service Code 11 which is Office Visit.

Modifier 1: HE=MENTAL HEALTH PROGRAM  
 HQ=GROUP SETTING  
 GT=TELEPHONE

99 or blank=FACE TO FACE WITH CLIENT, others may be present  
 UK=CLIENT NOT PRESENT-SERVICE TO COLLATERAL

HIPAA Service Name	Unit of Service	Service Modality	PROC	MOD 1	MOD 2	PLACE OF SERVICE	Medical MCD	Definition NON
<b>MEDICAID HEALTHCARE SERVICES</b>

NOTES: Non-Healthcare procedure codes (those that begin with the letter M) have been changed from 7 byte codes to 5 byte codes. For FY 03 and prior years, boards had the option of using the last 2 bytes of the 7 byte code to distinguish price differences at the provider level where the same procedure code was used to report activity in different provider programs that had unique costs. For FY 04 and later, the 5th byte of the 5 byte code will be used to capture this information. For example, Other MH Service (M314000) had distinct codes of M314000, M314001, M314002, etc thru M314009. The new 5 byte codes to be used will be M3141, M3142, etc. thru M3149. This change is necessary in order to prevent duplicate checking to deny claims with different prices for the same service, since Diamond duplicate checking only uses the first 5 bytes of the procedure code.

HEALTHCARE services do not have a locally defined 5th byte so different programs for the same service must be cost averaged.

Modifiers 1 & 2 are for use by State; Modifiers 3 & 4 are for Board use. Boards that require providers to use modifiers 3 and 4 should furnish instructions outlining the appropriate codes to use when same-day claims must be summarized.

For Mental Health Procedure codes, use of any modifiers in positions 1 & 2 except for those shown above will result in a DENIED claim.

Modifiers must be in the order specified or claim will be DENIED.

Use of the telephone modifier for services other than those specified will result in a DENIED claim.

Use of the telephone modifier in Modifier 3 or 4 for MH Medicaid billable services or for MH Residential Services will result in a DENIED claim.

Penal system (F4-5) and state hospital (F6-7) modifiers are replaced with place of service codes.

\*If the place of service on the claim is 51 (IMD or State Hospital) and the client is between the ages of 22 and 64, the claim will not be billed to
